

**Turn off energy log (In NS2)**

In common/mobilenode.cc

```
void
MobileNode::log_energy(int flag)
{
    if(!log_target_)
        return;
    /*[PH] turn off energy log
    Scheduler &s = Scheduler::instance();
    if(flag) {
        sprintf(log_target_->pt_->buffer(),"N -t %f-n %d -e %f", s.clock(),
            address_, energy_model_->energy());
    } else {
        sprintf(log_target_->pt_->buffer(),"N -t %f-n %d -e 0 ", s.clock(),
            address_);
    }
    log_target_->pt_->dump();
*/
}
```
